

42537

Infra-red thermometer

for hard-to-reach parts

precise

easy to use

FEATURES & APPLICATIONS

Infrared (IR) thermometers have become the preferred tool for temperature diagnostics and inspection. IR thermometers are easy to use, and since they don't contact the object being measured, they are the safest way to measure hot, hard-to-reach, or moving parts, while eliminating potential damage and contamination. Pull the trigger, and the infrared thermometer shows the temperature in its large, backlit display. The instruments becomes even easier to operate when aiming with the Laser Point™.

Infra-red thermometer

for hard-to-reach parts

FEATURES

- Temperature measurement range: -33;+500°C - °F or °C temperature readings
- Accuracy: $\pm 2\%$ or $\pm 2^\circ\text{C}$
- 8:1 Distance to Spot ratio - Laser Point™ to identify target
- Large, easy to read backlit display
- Response time: 1 second
- Emissivity: pre-set 0.95
- Power: 9V battery (included)
- Distance to Spot Size: 8:1
- Typical Distance to Target (Spot): Up to 1.5m
- Size: 175 x 390 x 79
- Weight: 330 grams
- 1-year warranty

APPLICATIONS

- Food Safety
- Home Inspection
- Electrical and Industrial
- Manufacturing quality control
